## What are the benefits of this course?

This is a career for people with strong interpersonal skills. As a WHS professional, you will be going into a workplace, overseeing workplace procedures and analysing the relevant risks and safety hazards involved in the process, and analysing the processes to produce improved policies ensuring the safety of the employees of the organisation.

You'll be giving training and feedback to employees on workplace practices, something best done in a way that is not critical, but by motivating staff to achieve greater health and safety outcomes.

### Here's what one of our students thinks...

"My trainer accepted my level of existing knowledge and background and adjusted expectations accordingly. Speaking with my trainer was very useful as they were able to construct a training plan that was suitable for me. This safety course has opened up many opportunities for my future and will aid greatly in applying to become a SSE on mine sites."

Michael Carswell  
Vitrinite Pty Ltd

## Where can this course take you?

Compliance with work health and safety laws is mandatory, and many courses and individual units educate and train workers in how to comply with organisational and legislative rules. This qualification extends that knowledge and understanding.

It is aimed at more senior tradespeople or business managers who require an in- depth understanding of the way in which Health and Safety can become a key platform in any organisation's safety culture, and a point of difference between just doing enough and actually embracing the spirit of the law.
