Civil Construction, Foreman, Construction Managers, Estimators, Project Managers, Site Supervisors, Superintendants...

If you have experience in one of these roles but no formal 'piece of paper' to prove it, then this course is for you.

You will discover and implement the practical strategies that will make a REAL difference to managing your civil construction projects:

- Supervise your team and projects
- Supervise your subcontractors
- Increase your teams productivity
- Safety, performance and morale
- Deliver projects on-time and in-budget and more effectively
- Reduce the time you need to put out 'emergency fires'

Completing this course qualifies you for the above roles and is now considered a MUST have for a career progression with all the major civil construction companies in Australia.

Qualified people are in high demand in Australia and in many other countries. This civil qualification is often the entry requirement for you to work overseas on major civil, oil and gas, coal seam gas projects eg. Kazakhstan, China, Laos, Middle East...

- Regular and UNLIMITED phone sessions with Trainer (day or evening)

"GTI is flexible with its time and did all they could to ensure I had the support I needed to succeed. I have been actively employed in the civil industry for over 10 years straight now so most of the subjects were second hand to me. I did however enjoy learning about road design again as I hadn't done them for a few years."
